**Student No:** 200104004099

## MinFit

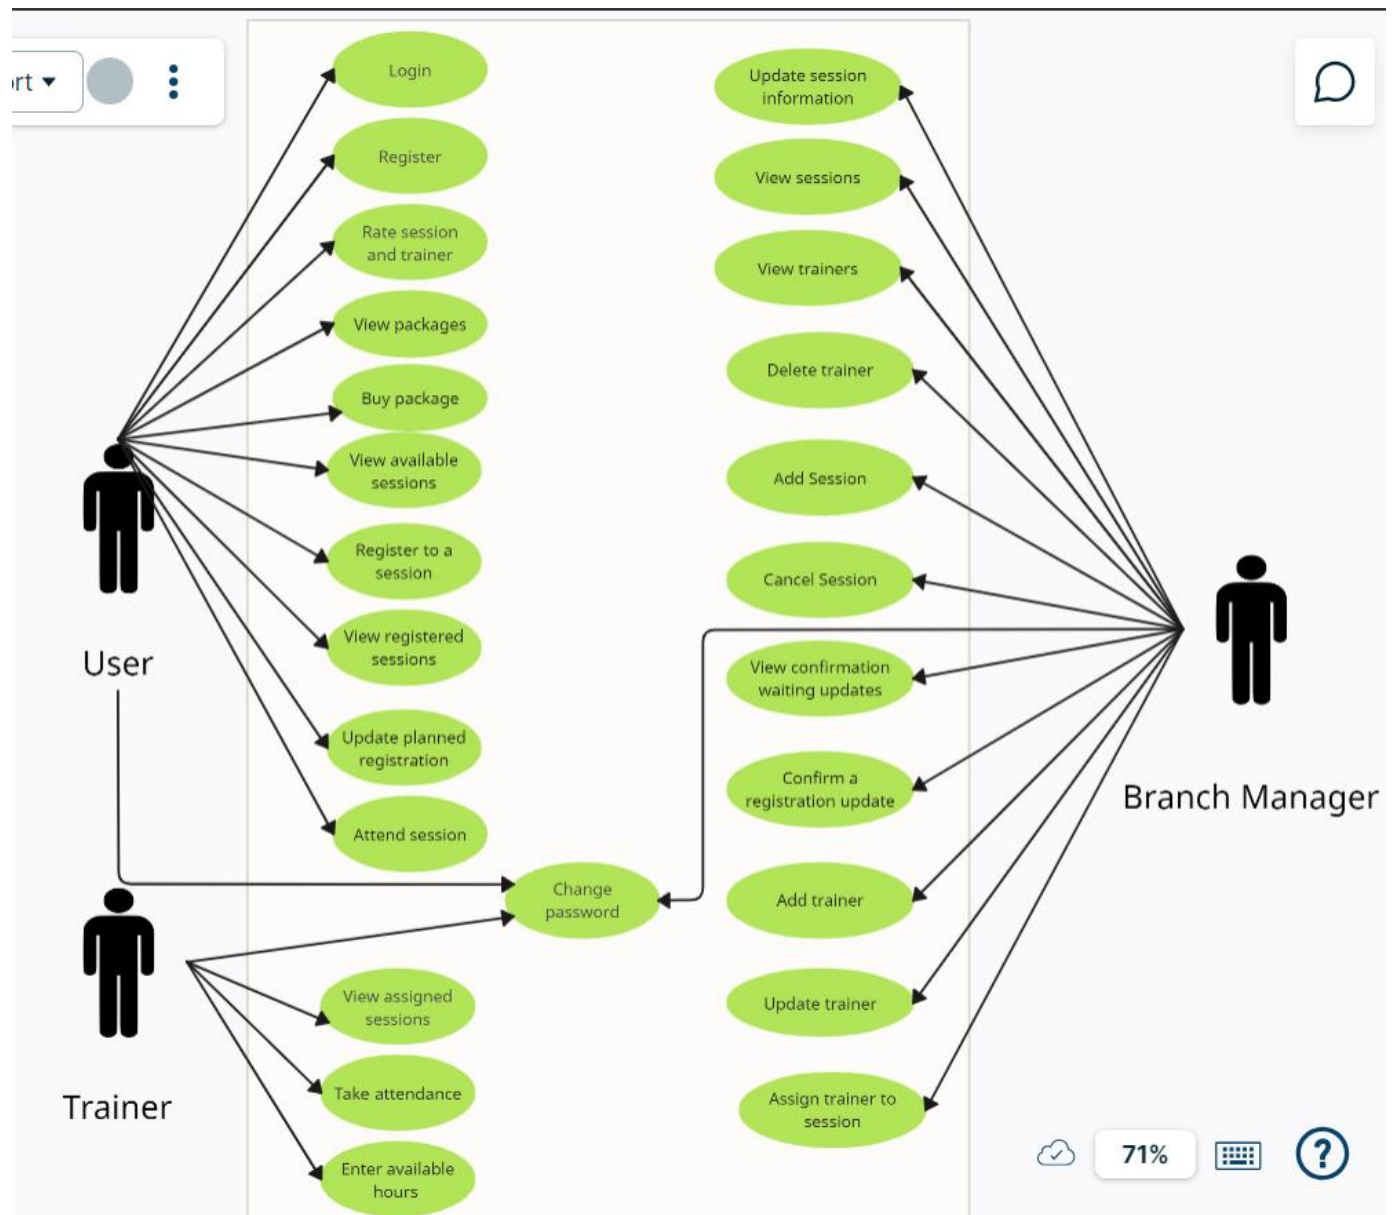

### USE CASE DIAGRAMS:

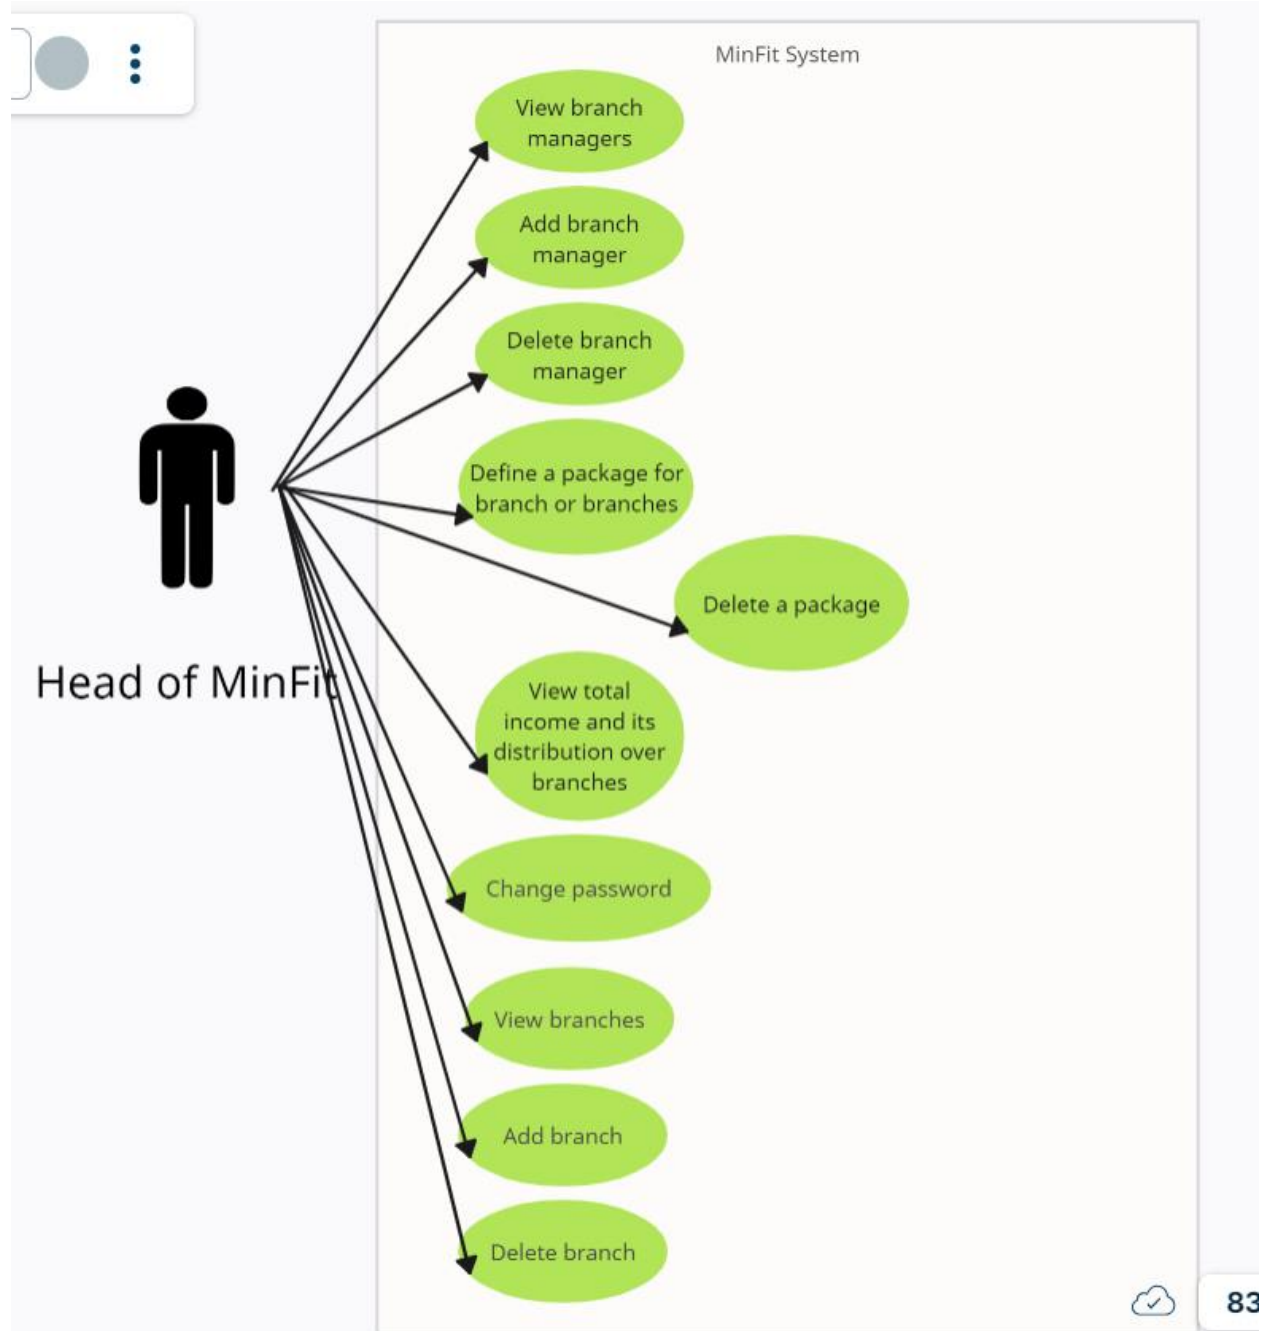

**User:** The customer of the saloon. It can buy/use packages to register to sessions and use the saloon.

**Branch Manager:** The manager of the specific branch. A branch can consist several cities. Branch manager is responsible for maintaining the sessions and trainers mainly.

**Head of Minfit:** The head of the MinFit saloon chain. It has some administrative functionalities. It manages branch managers, and can define packages.

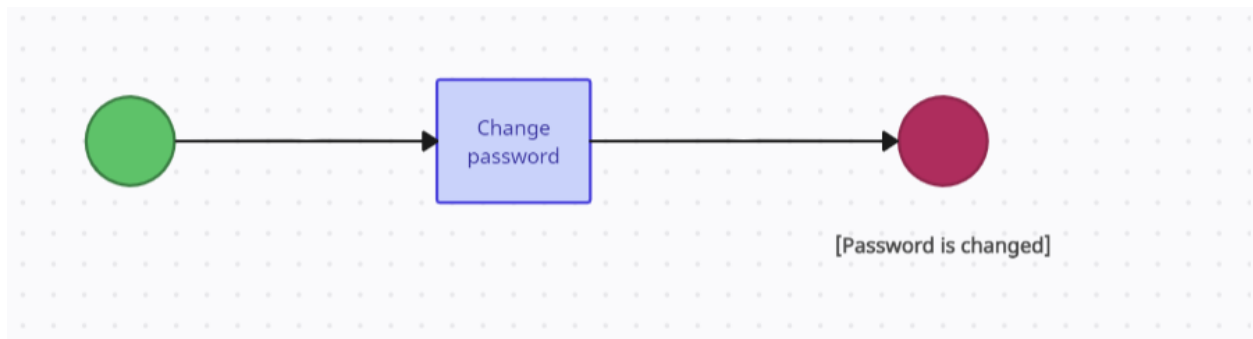

**Trainer:** A trainer which manages the sessions by taking attendance at the beginning of sessions, and by helping the users.

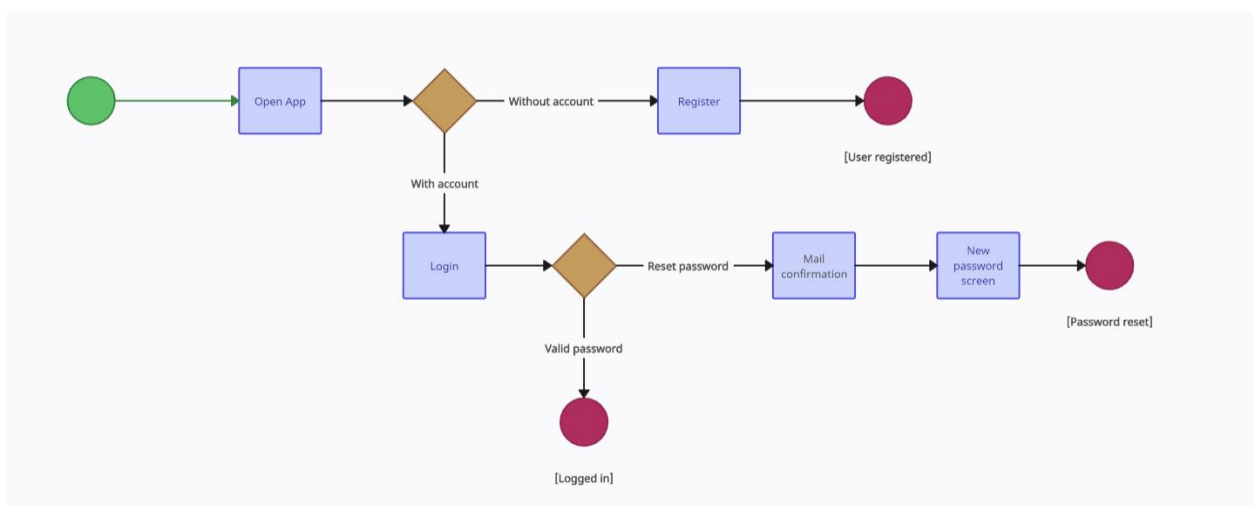

## PROCESS MODELS:

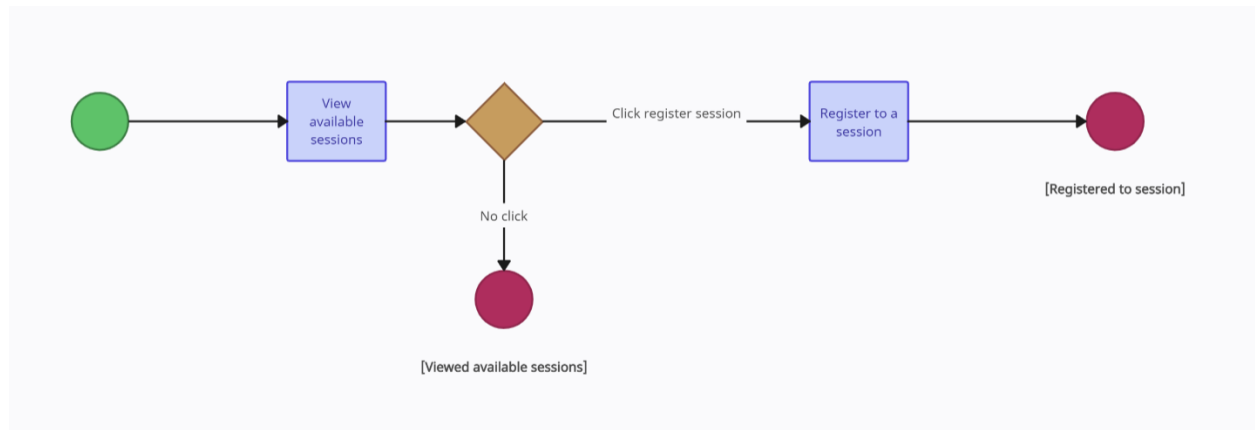

### Head of Minit/Branch Manager/User/Trainer - Change Password:

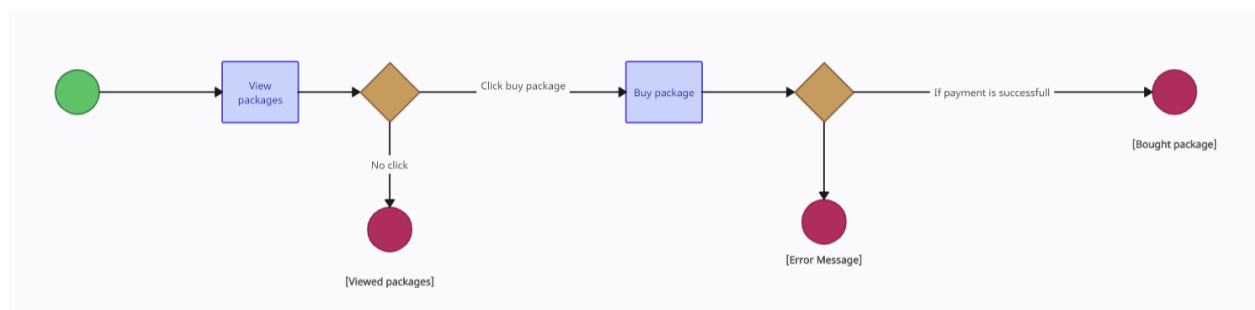

### Login/Register:

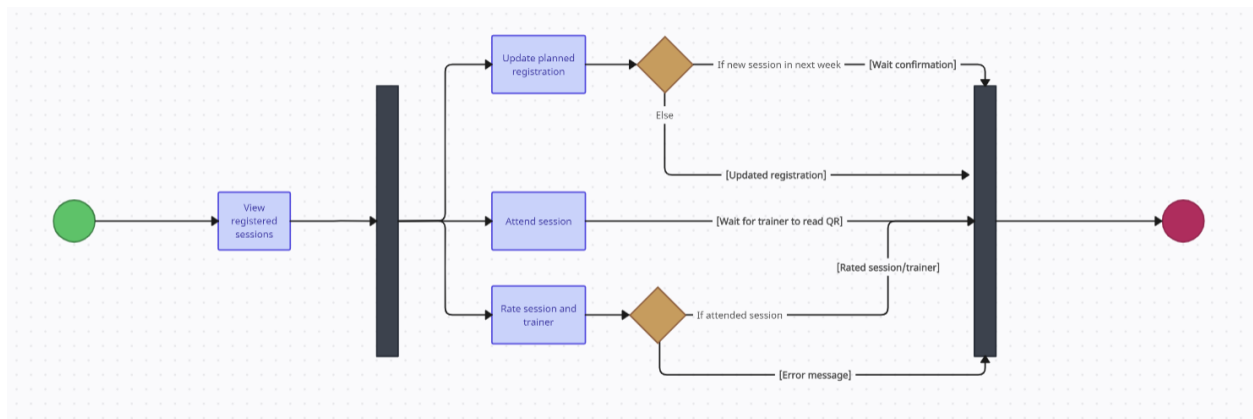

## User - View Available Sessions and Related Session Operations:

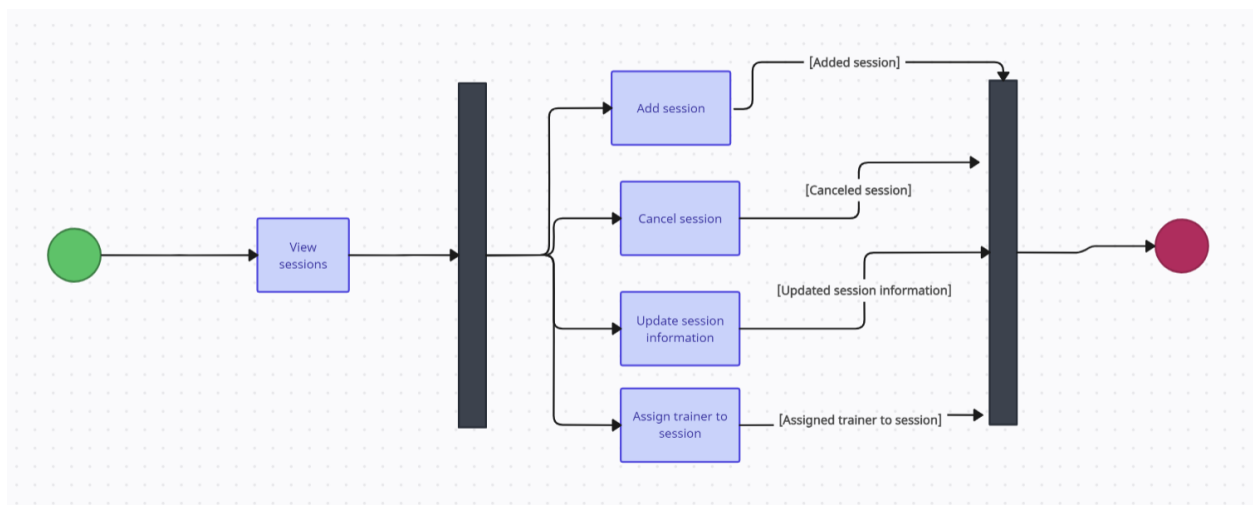

## User - View Packages and Related Package Operations:

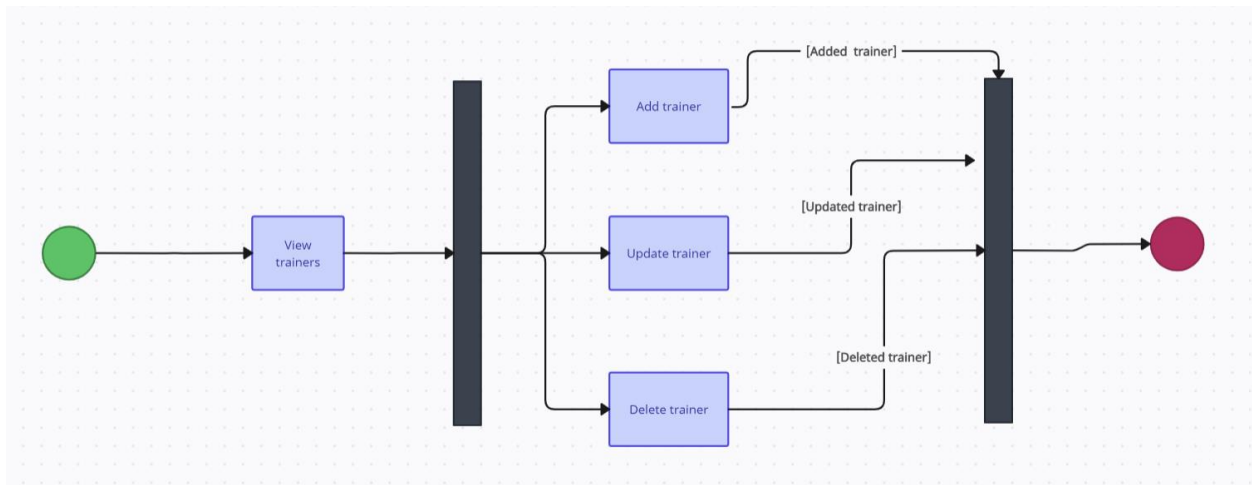

## User - View Registered Sessions and Registered Session Related Operations:

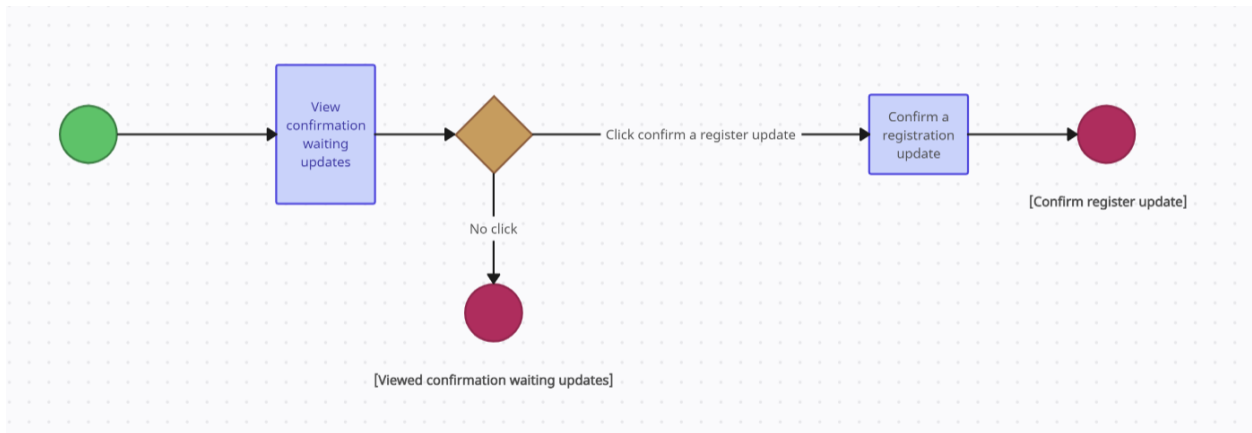

## Branch Manager – Session Operations:

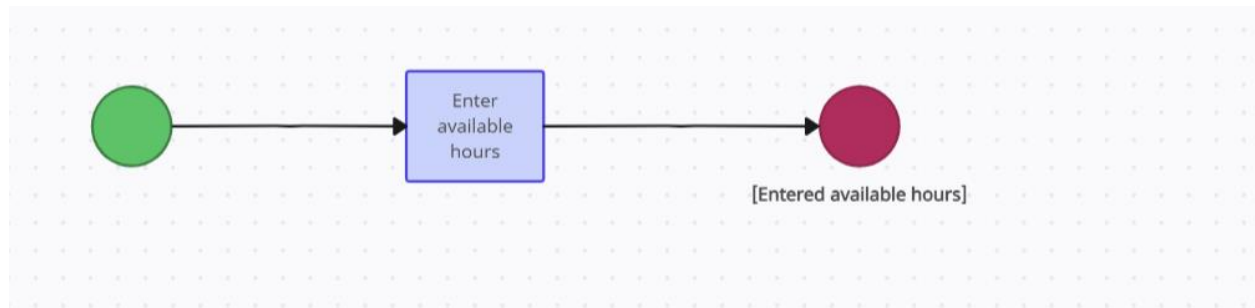

## Branch Manager – Trainer Operations:

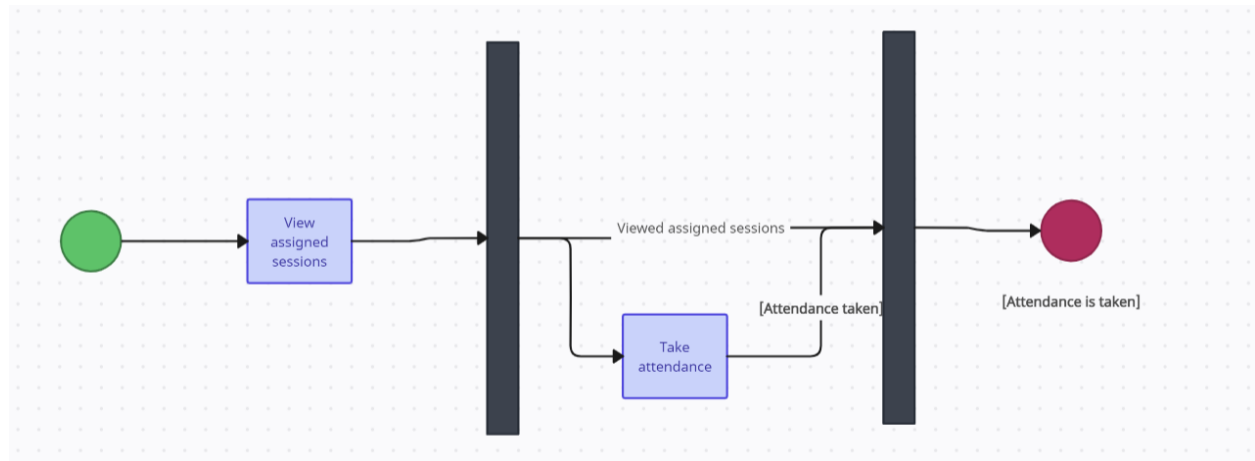

## Branch Manager – Confirmation Waiting Requests Operations :

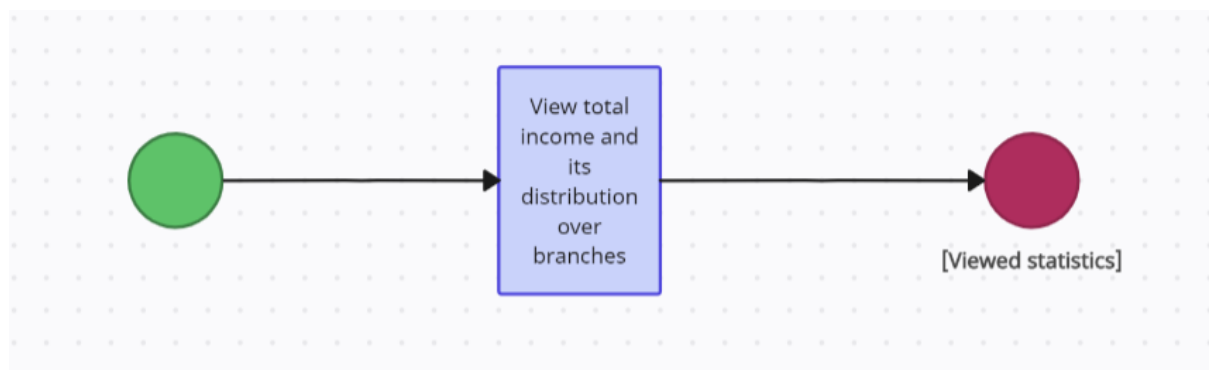

### Trainer – Enter Available Hours:

### Trainer – Assigned Sessions Operations:

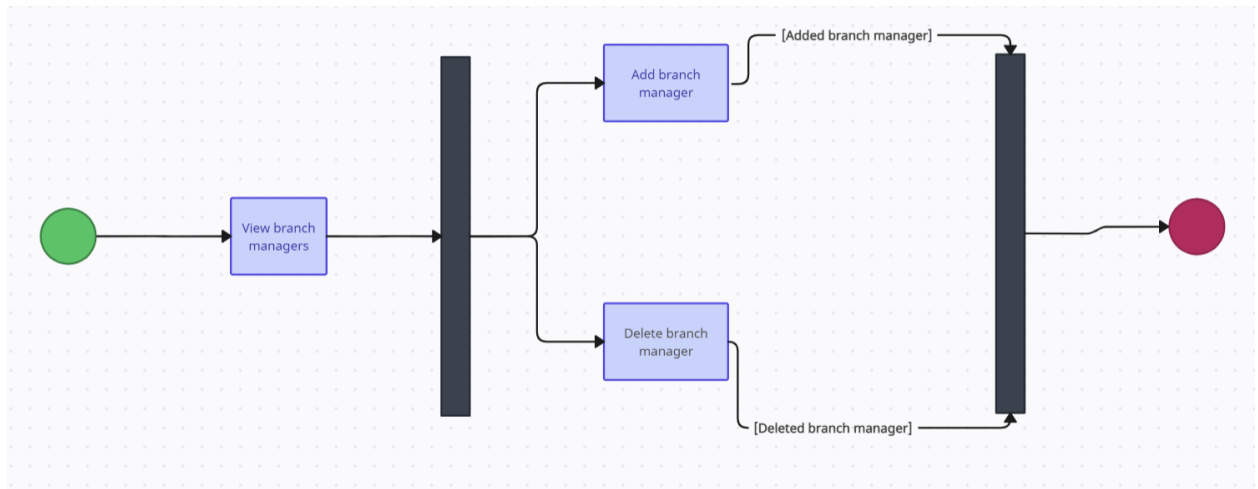

### Head of Minfit – View Statistics:

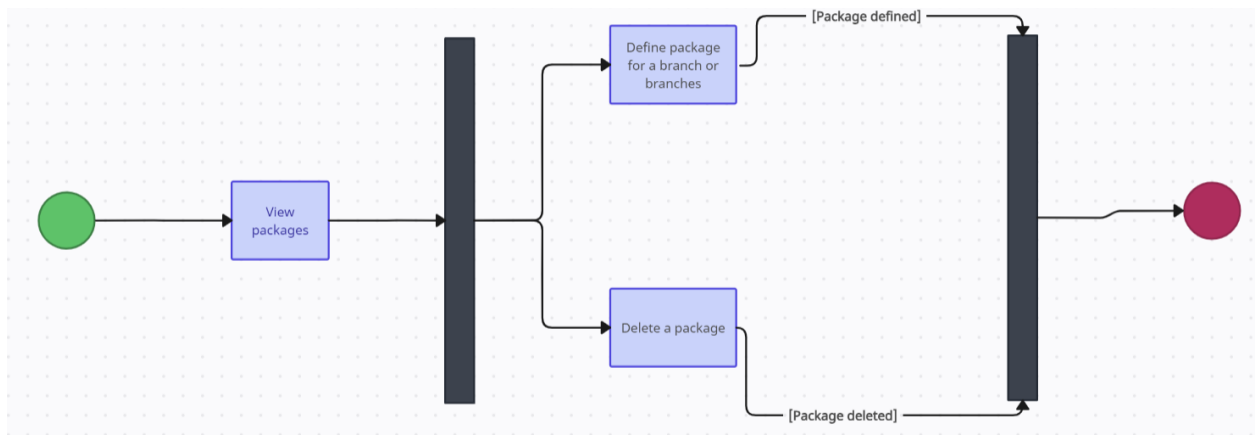

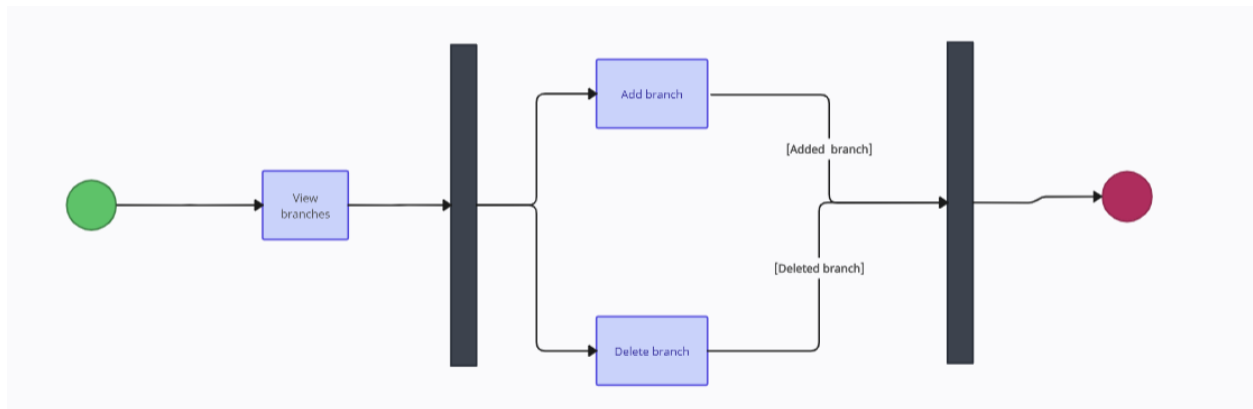

## Head of Minfit – Branch Manager Operations:

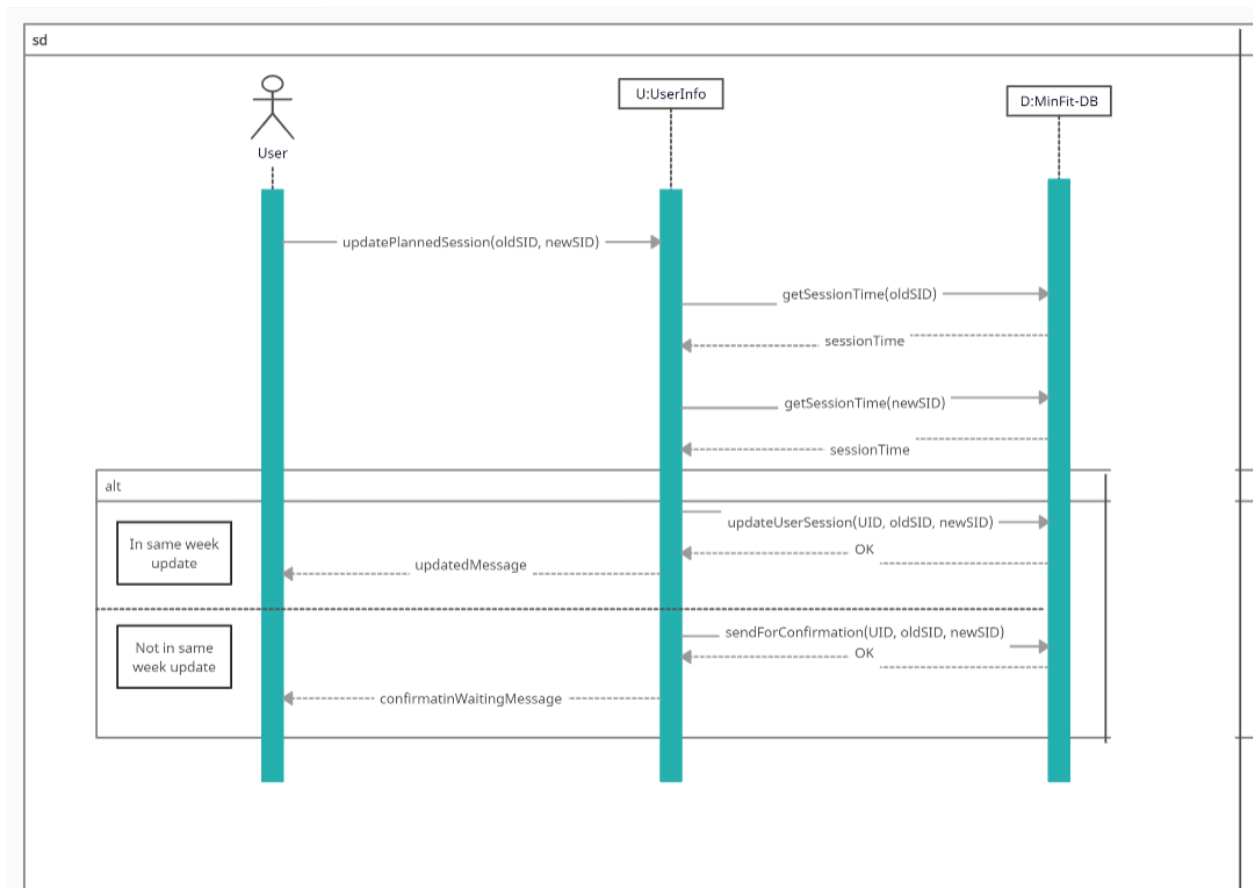

## Head of Minfit – Package Operations:

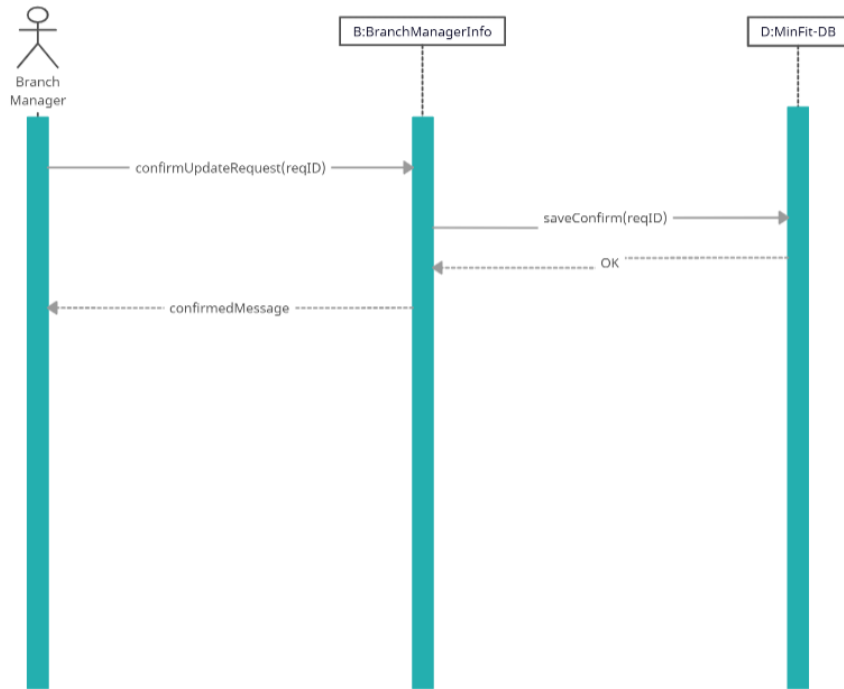

## Head of Minfit – Branch Operations:
